RecordIAB Console

An all-in-one digital recording solution!

An all-in-one, 8-channel recording console that lets you record, playback and store digital audio, the **RecordIAB Console** is an ideal replacement for end-of-life analog recording systems. **RecordIAB Console** comes with over 10,000 channel hours of internal storage capacity, a built-in CD/DVD burner and full networking capabilities for easy storage and backup. A complete system, **RecordIAB Console** is a fast and easy way to make the move to a digital recording system.

With simple, analog recording style controls, the RecordIAB graphical user interface is intuitive and easy to master. Operators can make synchronized text annotations, playback and/or monitor audio, and backup audio to a network or external location, even while recording.

RecordIAB Console Advantages

The RecordIAB Console is an all-in-one, rackmountable recording solution that comes with everything you need to record, annotate and archive your digital audio. Just plug in your microphones and go!

Solution Advantages

- Multi-channel digital audio capture with integrated annotation capabilities
- Comes with all the hardware you need, except microphones
- User-friendly graphical interface means minimal training required
- Can be controlled via touchscreen or keyboard/mouse
- Comes with a built-in CD/DVD burner for easy archiving and backup
- Records digitally so there are no tapes that can be ruined, lost, or damaged by age
- Clearly visible icons ensure you always know when recording is taking place
- Monitors each channel individually during recording
- Instant playback and review of audio, even while recording
- Easy search interface to quickly locate audio
- Supports simultaneous archive to external USB device, network drive, CD or DVD for added security and backup
- Archived disks/locations can include a copy of RCPlayer playback and transcription utility for remote playback on any computer
- RCPlayer supports USB footpedals and multi-channel playback control to aid transcriptionists

RecordIAB Console is...

Efficient... RecordIAB Console comes with all the hardware you need, just plug in your microphones and go!

Easy... An intuitive graphical user interface that's easy to master.

Secure... Redundant hard drives prevent loss of audio due to disk failure.

Complete... Digital audio capture, annotation, storage and management, in one convenient solution.

Same great software, three great solutions.

The RecordIAB suite offers three solutions built on the same user-friendly RecordIAB software platform. **RecordIAB Workstation** and **RecordIAB SE** offer the same interface as **RecordIAB Console**, but in different hardware configurations. Visit the VIQ Solutions' website for more details (www.viqsolutions.com).

Specifications

The RecordIAB Console lets you record, playback and manage digital audio, all from one contained unit.

- Uses a built-in 8-channel mixer that can record and mix up to eight distinct channels of audio
- Stores over 45 channel hours of audio on a standard CD
- Stores over 315 channel hours on a standard DVD
- Stores over 10,000 channel hours of audio on the hard drive
- Supports line and mic levels and phantom power on each channel
- Capable of simultaneous capture to network drives (via built-in 10/100/1000 Ethernet card) and/or external USB storage devices (via built-in USB 2.0 ports)
- Every archived CD/DVD or network location/external USB device comes with playback application for transcription purposes (supports USB foot pedal)
- If network connection is lost while archiving, recording to RecordIAB hard drive continues. Archiving will continue automatically when network connection is restored.
- Software-based design is easily upgradeable and scalable
- RAID-1 hard disk configuration provides automatic protection against disk failure
- Provides remote administrator-level configuration over WAN or LAN
- Provides USB 2.0 and PS/2 ports for external keyboard/mouse
- Provides standard VGA plug for external monitor

Hardware Specifications

- Dimensions (W x H x D): 17 3/4" x 7" x 20 1/2"
- Rackmountable: Standard 19" rack, 4RU height
- Display: 6.4" touchscreen
- Weight: 41 lbs.
- Removable Media Storage: 16x DVD-R-RW
- Redundancy: RAID 1 (mirroring) (2 x 160 GB drives)
- Network: 10/100/1000 Ethernet
